The Ocean Layers

The ocean is not the same everywhere. It has different layers!

SUNLIGHT ZONE

0 – 200 m (approx.)

- There is a lot of sunlight.
- The water is warmer.
- Many sea animals live here.

TWILIGHT ZONE

200 – 1,000 m (approx.)

- There is less light.
- The water is colder.
- Some animals have special adaptations (like big eyes).

DEEP OCEAN

1,000 m+ (approx.)

- There is no sunlight.
- It is very dark and very cold.
- Some animals live only here.
